## RECONSTRUCTION COURSE **ON CADAVER**

Our International faculty will present the latest techniques of microsurgical breast reconstruction, implant-based and basic flap elevation.

During the 2 days of the course, the attendees will practice **implant-based, ADM & meshes, pedicled flaps & perforator workhorse flaps** on fresh cadaveric material, with only **two dissecting participants per operating table**, under the supervision of one faculty member.

The course is designed for surgeons who want to improve their practice in the field of reconstructive surgery.

**The course is limited to 18 participants.**
